FOR IMMEDIATE RELEASE

Ghana Drunkards Association Commends President Mahama on 100,000-Hectare Oil Palm Initiative

The Ghana Drunkards Association warmly commends His Excellency President John Dramani Mahama for his ambitious plan to cultivate oil palm on 100,000 hectares of land by 2032.

As an association committed to the welfare, prosperity and responsible enjoyment of our members, we believe that a thriving agricultural sector is essential to building a stronger Ghana. The proposed expansion of oil palm cultivation has the potential to create jobs, increase opportunities for farmers, strengthen local industries and contribute significantly to economic growth.

We particularly welcome the potential benefits to young people and rural communities. If properly implemented, the initiative could support thousands of farmers and workers while creating opportunities across the oil palm value chain, from cultivation and processing to transportation and manufacturing.

We therefore encourage the government to ensure that the programme receives sustained investment, transparent implementation and strong support for smallholder farmers. We also call for measures that protect landowners, promote environmentally responsible farming and ensure that local communities benefit meaningfully from the initiative.

The Ghana Drunkards Association stands ready to support national development initiatives that improve livelihoods and put money in the pockets of ordinary Ghanaians.

We salute President Mahama for setting an ambitious agricultural target and urge all stakeholders to work together to make the 100,000-hectare vision a reality by 2032.

Yours Faithfully,

Moses Onyah.
President.
